AI FASHION DESIGN PLATFORM

From Your Imagination *to Wearable Design.*

An AI-powered fashion design platform that transforms ideas into customizable 3D clothing.

Imagine your wedding karakou or caftan, exactly as you pictured it.

ONE IDEA. ONE 3D GARMENT.

Describe in Darja • Generate • Customize in 3D • Wear it

What I Imagined Isn't What I Received.

01

Imagine preparing for your wedding...

You want a traditional karakou or caftan. You already see the colors, embroidery, patterns and where every detail goes.

>

02

You explain it to the tailor

Even a skilled tailor can't always get every detail from words and references alone.

>

03

It comes out different

Changes take time, and the finished piece may not match what you pictured.

Explaining a vision to someone else isn't always easy.

One Platform. Your Idea. Your Design.

What if you could see your idea before making it?

01

DESCRIBE

Type your idea, including in Algerian Darja

>

02

GENERATE

AI interprets the prompt and creates a design

>

03

CUSTOMIZE

Refine and personalize the garment

>

04

VISUALIZE

See it on an interactive 3D garment

>

05

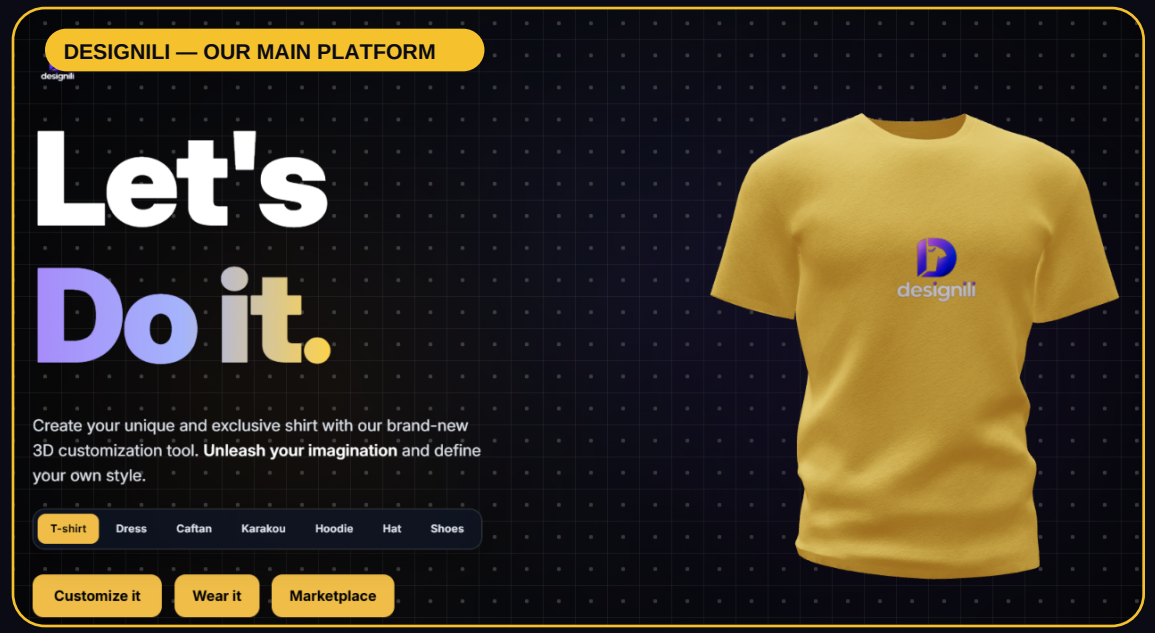

TRY ON

“Wear it” shows the design on you

OUTCOME

My idea. My design. Ready to share with a tailor, embroidery specialist or printing company.

See Your Idea Come to Life.

Real screenshots from the working prototype. [Add link to demo video here]

Fashion AI That Understands How You Express Yourself.

01

Algerian Darja

Express fashion ideas in a familiar, natural language.

02

AI creativity

Turn written ideas into visual fashion concepts.

03

Interactive 3D

Explore and personalize designs on 3D garments, from t-shirts to caftans and karakou.

04

Virtual try-on

See your creation on yourself with “Wear it”.

Culturally relevant language + AI + 3D + try-on, in one experience.

One Interactive Place for the Whole Creative Process

We are building an AI-powered fashion design platform that brings the creative process into one interactive place.

Describe 01 > **Generate with AI** 02 > **Customize** 03 > **See on 3D garment** 04 > **Try it on yourself** 05

A key part: Algerian Darja

Users describe their fashion ideas naturally while the AI helps transform them into visual designs. They can then explore and refine their creations through the platform.

All in one experience

- AI image generation
- 3D fashion design and customization
- Algerian Darja
- Virtual try-on with “Wear it”

Eight People. One Fashion-Tech Vision.

AH Amani Hansali	MA Moncef Azzouz	AA Abdelkader Abbes	ZG Zina Guerda
KF Kassouar Fatima	AB Abdeldjalil Benchabne	MF Mohamed Fouad	MT Milissa Temam

Built together through the Thirduni program, 2026.

Help Us Turn Creative Ideas Into Designs People Can Wear.

NEXT STEP

Develop the AI design workflow further, improve the link between users' ideas and generated designs, strengthen the Darja experience, bring the platform together into one smoother end-to-end experience, and explore how finished designs can be shared with clothing professionals.

FIRST MONTH

1. Develop the AI workflow
2. Integrate Darja-based interaction
3. Refine the 3D and virtual try-on experience
4. Test the journey: idea > design > customization > try-on

Our goal: a more natural, interactive way to turn fashion ideas into designs people can see and wear.

THE ASK

We are looking for feedback, mentorship, and support to improve our AI workflow, strengthen our Darja experience, and deliver a seamless end-to-end fashion design experience.
