Financial Plan: AI 3D Fashion Design Platform

Hackathon financial document. All prices are shown in US dollars (USD) and Algerian dinars (DA), using 1 USD = 134 DA (official rate, October 2026). Dinar prices are rounded.

1. Overview

The platform lets people design clothes in 3D from a text prompt (in Darija or English), preview them with the Wear it camera feature, browse other people's stores, and order the finished garment from partner print shops in Algeria. It serves two audiences: individual customers and companies.

Revenue comes from three sources:

1. **Subscriptions** for the design tools (individuals and companies).
2. **Commission** on print orders, paid by the partner print shop.
3. Nothing else for now: the garment and printing are never paid to the platform.

2. Pricing plans

The unit we limit is the **generation**: one AI design request (a new prompt or a regenerate). Changing colors, uploading artwork, rotating the 3D garment and browsing stores are free and unlimited.

Individuals

	Free	Pro	Studio
Monthly price	$0 (0 DA)	$9 (1,200 DA)	$19 (2,550 DA)
Annual price	n/a	$79 (10,600 DA)	$169 (22,600 DA)
Generations	3 in total	60/month (100 on annual)	150/month
Browse other stores and designs	Yes	Yes	Yes
Wear it	No	Yes	Yes

	Free	Pro	Studio
Order from partner print shops	No	Yes	Yes
Export files (PNG, SVG, PDF)	No	No	Yes
Print with any outside shop	No	No	Yes

Companies

	Business	Business Plus
Monthly price	$39 (5,200 DA)	$79 (10,600 DA)
Annual price	$349 (46,800 DA)	$699 (93,700 DA)
Generations	300/month, shared	600/month, shared
Wear it	Yes	Yes
Order from partner print shops	Yes	Yes
Bulk orders (many pieces, one design)	Yes	Yes
Brand kit (logo and colors)	Yes	Yes
Export files and outside printers	No	Yes

Upgrade path: Free, then Pro, then Studio. Companies start at Business and move to Business Plus if they need their own printers.

Payment methods for subscriptions: Edahabia and CIB as the main methods, international Mastercard as a secondary option.

3. Printing partners

Printing is **separate from the subscription**. The plan pays for the design tools only. The garment, the printing and the delivery are paid to the print shop.

Notice shown to users on the pricing page, at export and at the order step:

> Your plan covers the design tools. The garment and printing are paid separately to the print shop you choose.

Order flow

1. The customer finishes a design and checks it with Wear it.

2. They click Order this design and choose garment, size, color, quantity and delivery address (wilaya).
3. The platform lists partner shops that cover that area, with total price and delivery time.
4. The customer picks a shop. The platform sends the shop the order and the print files.
5. The customer pays the shop (cash on delivery for the hackathon). The platform does not handle this money.
6. The shop prints the garment and delivers it to the customer's home. Order status is shown in the app: received, printing, shipped, delivered.

Platform revenue from printing: a 15% commission on each completed order, invoiced to the shop (not charged to the customer). Studio and Business Plus users who print outside the platform generate no commission, which is why those plans cost more.

4. Unit economics

Assumed cost of one AI generation: **$0.03 (about 4 DA)**. This is an estimate in the $0.01 to $0.05 range for a paid image API and has not been verified. Payment fees are assumed at 3%. Wear it runs on the user's device (MediaPipe), so it costs almost nothing per user.

Margins below assume the user consumes their **full** generation allowance, which is the worst case.

Plan	Revenue per month	AI cost at full use	Payment fee	Margin per user per month	Margin %
Pro (monthly)	$9.00 (1,200 DA)	$1.80	$0.27	$6.93 (930 DA)	77%
Pro (annual)	$6.58 (880 DA)	$3.00	$0.20	$3.38 (450 DA)	51%
Studio (monthly)	$19.00 (2,550 DA)	$4.50	$0.57	$13.93 (1,870 DA)	73%
Studio (annual)	$14.08 (1,890 DA)	$4.50	$0.42	$9.16 (1,230 DA)	65%
Business (monthly)	$39.00 (5,200 DA)	$9.00	$1.17	$28.83 (3,860 DA)	74%
Business Plus (monthly)	$79.00 (10,600 DA)	$18.00	$2.37	$58.63 (7,860 DA)	74%

Free trial cost: 3 generations at $0.03 is about **$0.09 (12 DA) per sign-up**. This is the customer acquisition cost of the free tier.

Print commission per order:

- Individual order: average 3,000 DA ($22.40), so 450 DA ($3.36) commission.
- Company bulk order: average 40,200 DA ($300), so 6,030 DA ($45) commission.

5. Year 1 cost breakdown

Cost	Year 1 (USD)	Year 1 (DA)	Share
AI generation (free trials, paid users, companies)	$2,634	353,000	47.5%
Hosting and infrastructure	$720	96,500	13.0%
Payment processing (3% of subscriptions)	$484	64,900	8.7%
Marketing and print shop onboarding	$1,200	160,800	21.7%
Contingency (10%)	$504	67,500	9.1%
Total	**$5,542**	**about 742,600**	100%

Hosting is assumed at $40/month for months 1 to 6 and $80/month for months 7 to 12. Marketing and shop onboarding is assumed at $100/month.

6. 12-month projection

Growth assumptions

- New free sign-ups grow from 100 in month 1 to 1,100 in month 12 (6,775 in total).
- 5% of each month's sign-ups become paying individuals.
- 8% of paying individuals cancel each month.
- Business accounts grow from 0 to 11 by month 12 (first one in month 3).
- Average individual revenue is $11.15/month (11% mix of annual plans recognized monthly: 55% Pro monthly, 15% Pro annual, 20% Studio monthly, 10% Studio annual).
- Average company revenue is $43.40/month (80% Business, 20% Business Plus, 30% on annual billing).
- 20% of paying individuals place one print order per month; each company account places one bulk order per month.

Month	New sign-ups	Paid users (individuals / companies)	Revenue (USD)	Revenue (DA)	Costs (USD)	Net (USD)	Net (DA)
1	100	5 / 0	$59	7,900	$173	-$114	-15,300
2	150	13 / 0	$155	20,800	$194	-$39	-5,200
3	225	23 / 1	$362	48,500	$228	$134	18,000
4	300	36 / 1	$513	68,800	$260	$254	34,000
5	400	53 / 2	$805	107,800	$309	$495	66,400

Month	New sign-ups	Paid users (individuals / companies)	Revenue (USD)	Revenue (DA)	Costs (USD)	Net (USD)	Net (DA)
6	500	74 / 3	$1,141	152,900	$367	$774	103,700
7	600	98 / 4	$1,514	202,800	$474	$1,040	139,300
8	700	125 / 5	$1,920	257,200	$543	$1,377	184,500
9	800	155 / 6	$2,363	316,600	$617	$1,746	233,900
10	900	188 / 8	$2,931	392,800	$705	$2,226	298,300
11	1,000	223 / 9	$3,433	460,100	$789	$2,644	354,400
12	1,100	260 / 11	$4,046	542,200	$884	$3,162	423,700
Total	**6,775**		**$19,241**	**about 2,578,300**	**$5,542**	**$13,699**	**about 1,835,700**

(Monthly figures are rounded, so rows may differ from the totals by $1.)

Year 1 revenue by source

Source	USD	DA	Share
Individual subscriptions	$13,971	1,872,000	73%
Company subscriptions	$2,170	290,800	11%
Print commission	$3,100	415,400	16%
Total	**$19,241**	**about 2,578,300**	100%

Key results

- The platform has its first profitable month in **month 3** and is cumulatively profitable from **month 4**.
- Month 12 recurring subscription revenue is $3,376 (about 452,400 DA) per month.
- Net margin over the year is about 71% before salaries and taxes.

Sensitivity: if a generation costs $0.05 instead of $0.03, year 1 costs rise to about $7,474 and net profit stays around $11,800.

7. Key assumptions

All figures are estimates for a hackathon prototype, not audited projections.

- Exchange rate: 1 USD = 134 DA, official rate (about 134.5 in mid-October 2026). It moves, so DA prices should be reviewed regularly.

- AI generation cost: $0.03 average, assuming a paid image API with commercial terms.
- Average usage: 50% of the generation allowance for paying users.
- Free to paid conversion 5%, monthly churn 8%.
- Payment fees 3%: this is a placeholder. Actual Edahabia and CIB processing fees must be confirmed with the payment provider.
- Print commission 15%, collected by monthly invoice to each shop.
- Excluded: founders' salaries, taxes, legal and company registration costs, and the cost of recruiting print shops beyond the marketing budget.

8. Risks and notes

- **Free AI services are for the prototype only.** The free Hugging Face Space used today has variable quotas and is not meant for a public service. A paid image API is needed at launch, which is already counted in the AI cost line.
- **Wear it** in paid plans uses MediaPipe on the device. The photo try-on models (FitDiT and IDM-VTON) are licensed for non-commercial use only and are not part of any paid plan.
- **Print shop supply:** the order flow only works if enough local shops sign up. Recruiting a first group of shops across several wilayas is the main operational task.
- **Commission leakage:** Studio and Business Plus users can print elsewhere, so those plans are priced higher to make up for the lost commission.
- **Currency risk:** subscription prices are set in both currencies, but costs (AI API, hosting) are paid in USD.
